Summary

DevOps Engineer with 1+ year of production experience building and operating Kubernetes, Terraform, and AWS infrastructure for banking-grade systems across 4 environments and 3+ bank clients at a fintech startup, validated by AWS certifications (Solutions Architect Associate – SAA-C03, Cloud Practitioner – CLF-C02).

Technical Skills

Cloud Platforms	AWS (Compute, Networking, Storage, IAM, EKS/ECS, RDS, Serverless, Monitoring), GCP
Infrastructure as Code	Terraform (modules, remote state, drift detection)
Containers & Orchestration	Kubernetes, Docker, Helm, Argo CD, Sealed Secrets
CI/CD & GitOps	Jenkins, GitHub Actions, GitOps (Argo CD)
Observability	Prometheus, Grafana, Loki, ELK Stack, OpenTelemetry
Languages	Bash, Python, Go, JavaScript
Linux & Networking	Linux (Ubuntu), systemd, SSH, DNS, CIDR, Nginx, VPN, VPC Peering
Tools	Git, Docker Compose, tmux, Tailscale, Apache Guacamole

Experience

DevOps Engineer (Intern)

Jul 2025 – Jul 2026

Hyperface Technologies — Fintech CCaaS Platform for Banks

Bangalore, India

- Terraformed **AWS** infrastructure and GitHub organization — **100+ teams**, **80+ users**, and **30+ repositories** — across **150+ files**, converting a 4-engineer manual workflow into fully auditable Infrastructure as Code
- Migrated all **Jenkins** CI/CD pipelines to per-repo **GitHub Actions**, cutting build time by **45%** via **Docker** layer caching and stateless workflow design
- Managed production **Kubernetes (EKS)** — **15+ microservices** and **30+ Helm charts** — implementing GitOps with **ArgoCD**, **Sealed Secrets**, and **HPA** across **4 environments** for **3+ banking clients**
- Deployed complete **DC + DR** infrastructure integrating **10+ services** including MySQL, PostgreSQL, Redis, Kafka, ClickHouse, Elasticsearch, and MinIO for banking-grade production workloads
- Built end-to-end observability pipeline using **Prometheus**, **Grafana**, **Loki**, and Elasticsearch + Logstash via **OpenTelemetry**, enabling metrics, logs, and alerting across all environments
- Engineered **package-based** deployment automation reducing production setup to **3–4 commands**; authored **30+ runbooks** covering 8 services and external dependencies

Projects

DevOps Platform

[GitHub](#)

Terraform · Kubernetes · Argo CD · GitHub Actions · Prometheus · Grafana · Loki

- Provisioned a **k3s Kubernetes** cluster using **Terraform** and implemented **GitOps** deployment with **Argo CD**, **Helm**, and **Sealed Secrets** for automated, auditable delivery
- Engineered **GitHub Actions** CI/CD pipeline: multi-stage **Docker** build → **Trivy** scan → **GHCR** push → **Argo CD** auto-sync
- Implemented **Prometheus**, **Grafana**, and **Loki** observability with custom alerting rules, per-service dashboards, and cross-service log correlation

ChessPro

[GitHub](#)

Go · Next.js · WebSockets · PostgreSQL · Redis · Stockfish · LLM

- Built a real-time chess platform with a **Go backend** and **Next.js frontend**; used **WebSockets** for live move synchronization and **Redis Pub/Sub** for game state management
- Integrated **Stockfish** (sidcar + WASM) for AI move analysis and **LLM-driven** post-game analysis engine added **Chess.com** and **Lichess** API integration with **PostgreSQL**-backed game history
- Deployed on **Kubernetes (k3s)** with **Helm** and **GitHub Actions** CI/CD; monitored using **Prometheus** and **Grafana**

Education

Siddaganga Institute of Technology (SIT)

Tumkur, India

B.E., Electronics & Communication Engineering — CGPA: **8.53** / 10

2022 – 2026

Certifications

AWS Certified Cloud Practitioner (CLF-C02)

Feb 2026

AWS Solutions Architect Associate (SAA-C03)

May 2026
